ELECTRICAL TROUBLESHOOTING FOR IRRIGATION SYSTEMS

This class combines classroom instruction and hands-on instruction of basic electrical components of an irrigation system. You will learn techniques to determine the electrical viability of each component, proper usage of equipment, situations in the field, and ways to prevent electrical surges and damage to irrigation controllers and related components. We will also be covering the topic of Two-Wire Irrigation.

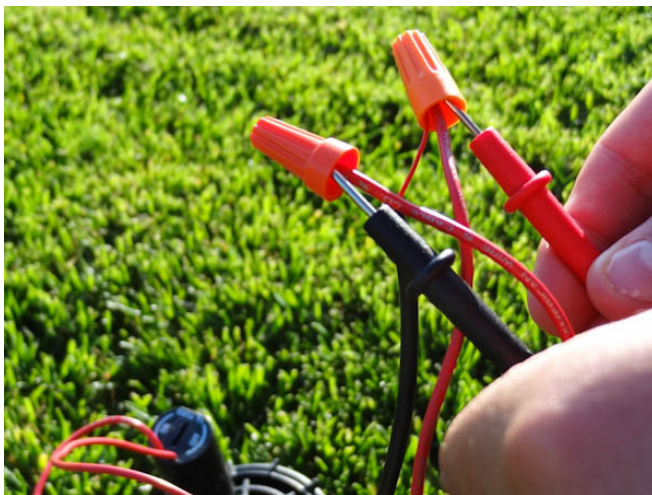

Topics covered in the two-wire segment include proper wire sizing, the proper wire path, decoders, grounding and control system.

LOCATION:	DATE:	TIME:
Longmont	January 9, 2018	8:00am to 4:00pm
Englewood	January 11, 2018	8:00am to 4:00pm

BACKFLOW PREVENTION FOR YOUR LANDSCAPE & GETTING THE MOST OUT OF YOUR PVC

This class is a two part class teaching you the basics of backflow prevention and proper installation of PVC and HDPE pipe.

- In the morning session, you will learn how to identify which backflow device to use on your project. You will also learn how to troubleshoot and repair devices.

Instructor: Mike Brune | RepMasters/Febco

- In the afternoon session, you will learn the proper installation and repair practices with PVC pipe, valves and fittings. You will also learn what the most common PVC failures are and how to avoid them.

Instructor: Jeff Butler, Craig Florence & Scott Stewart | Dillon Company
